Objective: Teachers will be able to practice and role play positive framing as a trauma-informed classroom strategy.

Notes: This Professional Development is suitable for groups who already have a baseline understanding of the effects of trauma in the classroom.

Total time: 35 minutes minimum

Materials needed:
1. Workshop Packet
   a. Worksheet: Matrix of School Success Framework Strategies
   b. Trauma in the Classroom Factsheet
   c. Strategy Toolkit
2. Role Play Scripts
3. Role Play Feedback Forms

What is Trauma?

Trauma is a single or series of events or a set of circumstances that overwhelms an individual’s ability to cope appropriately. Events that are considered traumatic will involve feelings of fear or danger and threatened or actual physical, mental or emotional abuse.

The effects of these Adverse Childhood Experiences, or ACEs, are often long-lasting and may lead to negative and unhealthy behaviors in adulthood. As the number of ACEs increases, so does the risk of negative outcomes later in life.

Children who experience trauma may also experience negative impacts relating to their education. Trauma may lead to increased school absences and decreased reading levels and school performance.

Traumatic Events

A traumatic event may be a single episode or could happen repeatedly over a period of time. Trauma is considered cumulative, as the effects of trauma on a child usually worsen if they are continually exposed to traumatic events. Some examples include:

- Sexual or physical abuse
- Neglect or abandonment
- Life-threatening illness or death of a family member or caregiver
- Incarcerated family member
- Accident
- Natural Disasters, like hurricanes and floods
- Medical problem and staying in the hospital
- Victim or Witness of Domestic violence
- Homelessness or temporary housing
- Victim or Witness of violence in the community or at school

Signs of Trauma

A body’s natural response to any stress is fight, flight, or freeze which causes the nervous system to go into an elevated state and then returning back to its natural state. When a child has experienced toxic stress (trauma) however, the body perceives the elevated state as normal.
**Triggers**, or “threat-cues”, are situations that may set off a reaction by a child who has experienced trauma. Triggers may include loud noises, criticism, demeaning tone of voice, or activities that involve particular memories.

As a teacher, you may be able to notice trigger warnings, or situations that signal possible triggers. If a child is restless, short of breath, shaking, crying, using aggressive language, or clenching their teeth or fists, they may be particularly prone to reacting to triggers.

**Effects of Trauma**

Students who experience trauma may exhibit specific behaviors in the classroom. These effects may compromise developmental milestones of a child and often differ between students in lower and upper elementary grades.

<p>| Behaviors Indicative of Exposure to Trauma in Children, by Elementary Age Group |</p>

</table>
| **CREATING A SAFE AND SUPPORTIVE SCHOOL ENVIRONMENT** | Empathy | ● Actively listen  
● Normalize the experience  
● Minimize self-blame  
● Avoid giving advice |
| | Strengths-based approach | ● Deliberately point out actions and characteristics that are positive, unique, or valuable  
● Guide a student towards recognizing and using his or her strengths  
● Redirect a challenging behavior by focusing on what you know the students can do well |
| | Predictability | ● Be clear about expectations  
● Follow through  
● Keep a consistent routine  
● Talk through changes |
| | Prevention rather than punishment | ● Help the student identify triggers and create appropriate coping plans  
● Teach or demonstrate what “should” be done  
● Avoid punishment and isolation  
● Reward positive behavior to encourage and build confidence  
● Teach mindfulness  
● **Positive framing** |
| | Welcoming building environment | ● Make sure that classrooms and hallways are bright and clean  
● Don’t corner someone  
● Consider having a “safe corner” or a “peace room”  
● Greet students at the door  
● Make sure transition times are supervised |
| | Connection to school community | ● Institute a peer buddy program  
● Institute a student/adult mentorship program  
● Deliberately connect students to extracurricular activities  
● Use a team approach |
| | Partnership, not power | ● Avoid power/control struggles  
● Do not “corner” someone emotionally  
● Help individual students find coping strategies for stressors |
<table>
<thead>
<tr>
<th>FOSTERING SECURE ATTACHMENTS</th>
<th>Mentoring</th>
<th>Help children identify safe people to talk to in the school</th>
<th>Be patient and consistent</th>
<th>Family programming</th>
<th>Helping a child to cope</th>
<th>Use a team approach</th>
<th>STRENGTHENING NON-COGNITIVE SKILLS (I.E SOCIAL-EMOTIONAL LEARNING)</th>
</tr>
</thead>
</table>
|                             | ● Be available  
  ● Be consistent  
  ● Make sure the student knows that he can go to you in a crisis  
  ● Encourage self-motivation  
  ● Help students set goals and create strategies for reaching those goals | ● Post the names and roles of key school staff  
  ● Let students know how to contact a safe adult  
  ● Set clear expectations and boundaries | ● Give unconditional support  
  ● Set high expectations  
  ● Lead by example | ● Host family nights or other events  
  ● Make an effort to meet the caregivers where they are  
  ● Don’t engage in negative conversation about a family | ● Breathing for relaxation  
  ● Positive distractions  
  ● Promote leadership  
  ● Encourage peer support  
  ● Ensure children have a healthy diet  
  ● Ensure children have plenty of exercise | ● Stress inclusiveness and shared purpose  
  ● Share updates and successful strategies with other staff as appropriate | ● Focus on "what happened to you" rather than "what is wrong with you"  
  ● Ask more questions and listen to the answers  
  ● Watch for patterns and triggers  
  ● Keep in mind the student’s history | ● Focus on strengths, not deficit  
  ● Praise effort, not just outcomes  
  ● Focus on "should" rather than "should not" |
|                             |           |                                                           |                           |                  |                       |                     | Focus coping techniques  
  ● Talk about self-soothing  
  ● Talk about self-regulation  
  ● Help the student identify triggers and strategies  
  ● Show students where/how they have control |                           |                     | Empower students  
  ● Encourage intrinsic motivation  
  ● Build self-confidence  
  ● Promote leadership |

*LOW and SLOW when implementing strategies in the classroom, be mindful of tone and body language.*
ROLE PLAY ACTIVITY: PRE-K TO FIRST GRADE

Scenario One

Teacher: (at the board delivering a lesson)
Student: (humming, trying to talk to students on the rug)
Teacher: Let’s see, I want to celebrate table 2 for sitting quietly and listening. Who else can we celebrate?
Student: (student continues humming)
Teacher: (moving toward the student) hmmm, table 3 knows that it’s important to listen quietly so that we can hear and learn. (now looking at the student) Let’s see if we can get table 1 to listen without any extra sounds too?
Student: (notices the teacher’s attention and stops humming)
Teacher: Excellent! Now we can continue!

Scenario Two

Student: (bouncing in their seat) Pick me! I know the answer!
Teacher: (to the class, not the student) Let me see a silent hand if you want to tell us the answer.
Student: But I know the answer!
Teacher: I see, one, two, three, four, five, six, silent hands, let see how many we can get.
Student: (loud huff, but stops calling out, raises hand quietly)
Teacher: (calls another student) can you tell us the answer?
Student: That’s not fair!
Teacher: We want to hear from everyone, but if you can raise your hand quietly, maybe I’ll call on you next time.

Scenario Three

Teacher: OK Kindergarten friends, all eyes on me.
Student: (continues coloring)
Teacher: I want to praise table 1 for putting the crayons down and giving me their eyes. Well done!
Student: (continues coloring)
Teacher: Table 2 is all ready to listen to for directions. I’m waiting for one more student at table 3 to put the crayon down and give me their eyes.
Student: (student drops the crayon but puts their head down)
Teacher: I see that most of us are ready to move on, so let’s talk about what’s next. (teacher gives instructions for next activity to the group and then goes over to talk to the student with their head down)
ROLE PLAY ACTIVITY: SECOND GRADE – FIFTH GRADE

Scenario One

Student: (as teacher is giving directions, student begins writing)
Teacher: I know that we’re excited to write their stories, but I need to finish these directions before we begin.
Student: I know what I want to write! I need to write before I forget it!
Teacher: (walking over to the student) I like that I have everyone’s attention, I’m waiting on one more person so that we can continue.
Student: (student drops the pencil)
Teacher: Thank you. (continues delivering instructions, speaks to the student individually)

Scenario Two

Student: (during line up a student is lingering near the cubbies avoiding the line)
Teacher: Thank you line leader for starting a strong line. I’m waiting on 5 more students to find their place so that we can go.
Student: (student doesn’t move but looks at the teacher)
Teacher: (gestures for the student to come over) I see that we are mostly ready, just waiting for 2 more. I want to see who can wait quietly in line so that we can leave.
Student: (student comes over to the teacher but doesn’t say anything)
Teacher: You seem to be upset, but can you join the line and let’s talk about this when we get downstairs?
Student: (student nods and joins the line)

Scenario Three

Student: (student comes in at the start of the day and puts their head down after putting their things away)
Teacher: So we are off to great start today, I see that we are putting our things away and one table is already seated and reading their books well done.
Student: (student keeps their head down)
Teacher: Let’s see if we can all get settled in our seats in another 60 seconds so that we can start the day. (walks over and taps the student)
Student: (students raises their head)
Teacher: Are you ready to get started? What’s going on?
Student: (student puts their head down)
Teacher: Step to my desk so that we can talk about what’s going on. (To the class) I see that we’re almost there, once you’re at your seat, I want to see you reading quietly like table 1.
SKIT REFLECTION

Please respond to the following questions after each scenario:

Scenario One

1) How did the teacher’s response help to diffuse this situation in a trauma sensitive way?

2) What is another way that the teacher could have responded?

Scenario Two

1) How did the teacher’s response help to diffuse this situation in a trauma sensitive way?

2) What is another way that the teacher could have responded?
WORKSHOP SURVEY

Thank you for taking part in our workshop! We would like your help in understanding how to improve the workshop, how much you learned, and if you think that you will apply what you learned in your work and life. Please take a few minutes to fill the following survey. Honest feedback is welcome!

1) What was the best part of the workshop?

2) What did you LIKE LEAST about the workshop?

3) How would you improve the workshop?

4) Please circle the number that best represents your knowledge and skills before and after this training:

**Understanding the effects of trauma in the classroom:**

<table>
<thead>
<tr>
<th>BEFORE THE WORKSHOP</th>
<th>AFTER THE WORKSHOP</th>
</tr>
</thead>
<tbody>
<tr>
<td>Very Low</td>
<td>Low</td>
</tr>
<tr>
<td>1</td>
<td>2</td>
</tr>
</tbody>
</table>

**Using trauma-sensitive strategy of Positive-Framing in the classroom:**

<table>
<thead>
<tr>
<th>BEFORE THE WORKSHOP</th>
<th>AFTER THE WORKSHOP</th>
</tr>
</thead>
<tbody>
<tr>
<td>Very Low</td>
<td>Low</td>
</tr>
<tr>
<td>1</td>
<td>2</td>
</tr>
</tbody>
</table>

5) How likely are you to use the knowledge and skills that you learned in the workshop? (Please circle)

<table>
<thead>
<tr>
<th>Not likely at all</th>
<th>Not likely</th>
<th>Neutral</th>
<th>Likely</th>
<th>Very likely</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>2</td>
<td>3</td>
<td>4</td>
<td>5</td>
</tr>
</tbody>
</table>

6) What challenges do you think you will have in using what you learned?

7) Any other feedback?
